NHS

Wellbeing Services – potential implications for transport and travel

Areas of concern in acute Trust reconfiguration:

Substance Misuse Recovery Nurses - CHFT

Recovery nurses provide on ward assessment for patients where drug and alcohol dependency is an issue. Most activity takes place on the Gastro wards 7 days/week. If these shift to Calderdale there will be an impact.

TB Specialist Nursing Service

2 clinics per week provided at Acre Mills in conjunction with Respiratory Services. Majority of patients are migrants or from disadvantaged backgrounds. If services shift to Calderdale attendance rates will most certainly fall.

2 clinics per week provided at Acre Mills in conjunction with Respiratory Services. Majority of patients are migrants or from disadvantaged backgrounds. If services shift to Calderdale attendance rates will most certainly fall.

Internal reconfiguration:

Podiatry service redesign

Potential for some changes in locations of delivery. Impact and nature of this are being worked through

Locala NHS

Primary Care Services – Calderdale only

Primary care services Park & Calder & Walk-In-Service

Patients from Park & Calder Todmorden needing to travel to HRI for non-urgent care or consultant led clinics

NON urgent WIC patients can be directed to the minor injuries unit currently at HRI

Potential Issues

Currently only a bus link from Halifax to Hudds people would need to get a second bus to HRI from centre of Hudds

No direct line from Hudds to Halifax via train

3 buses or train Todmorden to Halifax then link via other routes

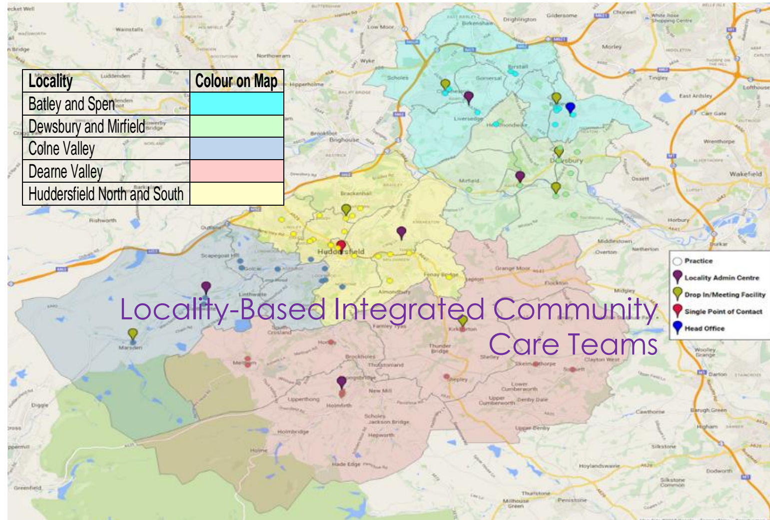
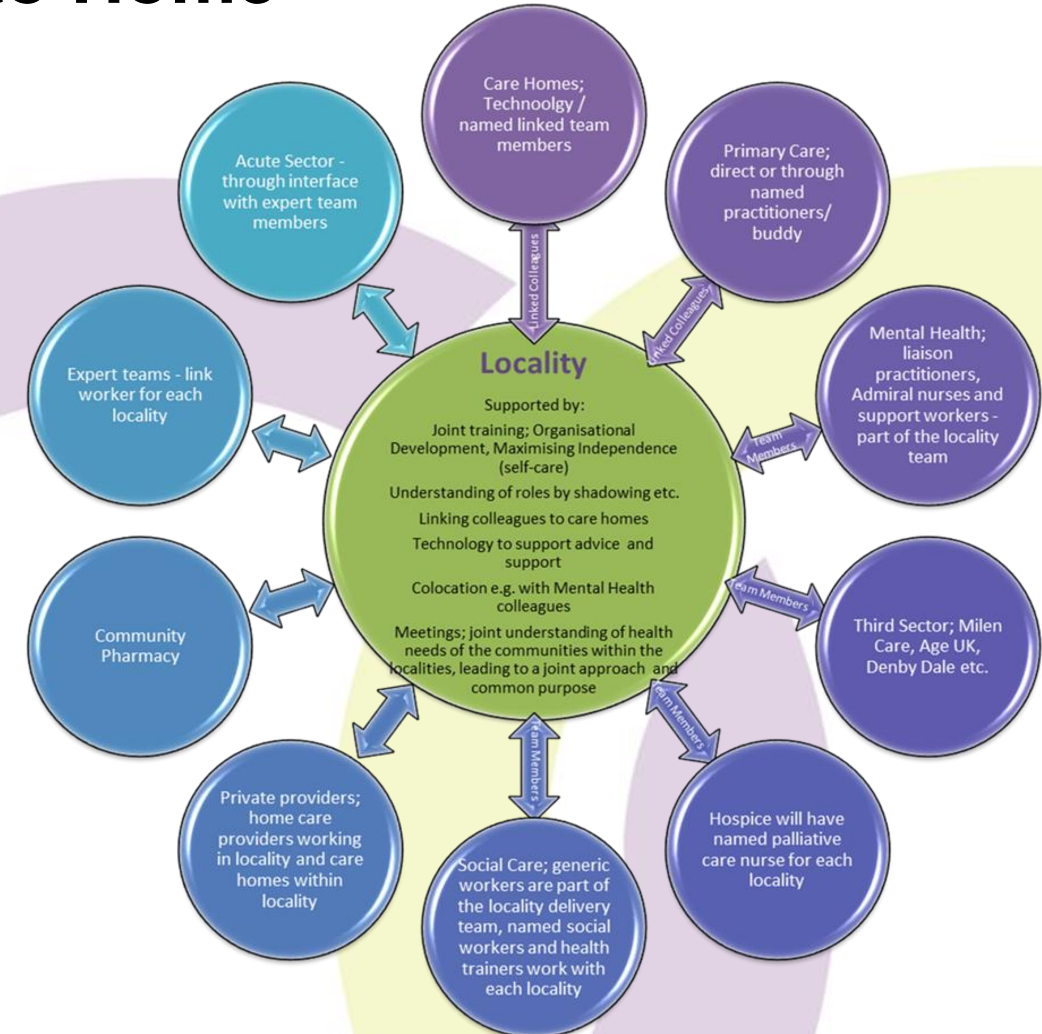
Community Services and care Closer to Home



- **Multi disciplinary, multi professional GP aligned**
- **Planned/routine and unplanned/urgent care**
- **Single core care plan, integrated holistic support**

- Specialist Adult therapy
- Expert teams e.g. respiratory, heart failure, OPAT (community IV), continence
- Palliative care and end of life advice and support, including a partnership with the hospice
- Helping people to leave hospital early or avoid going to hospital when they don't need to – Early Supported discharge, In Reach, Intermediate care beds, emergency care planning
- Older people's mental health care through a partnership with SWYPFT
- Maximising Independence and Self-Care training and support for teams
- Partnerships with social care, voluntary and community partners to enhance holistic self-care



Locala NHS

Risk Management and Admission avoidance through CC2H

First choice for non-life threatening routine urgent care

Integrated within a wider network of urgent and emergency care e.g. NHS 111, emergency services and primary care

Single Point of Contact with clear urgent pathways for patients and the public to understand

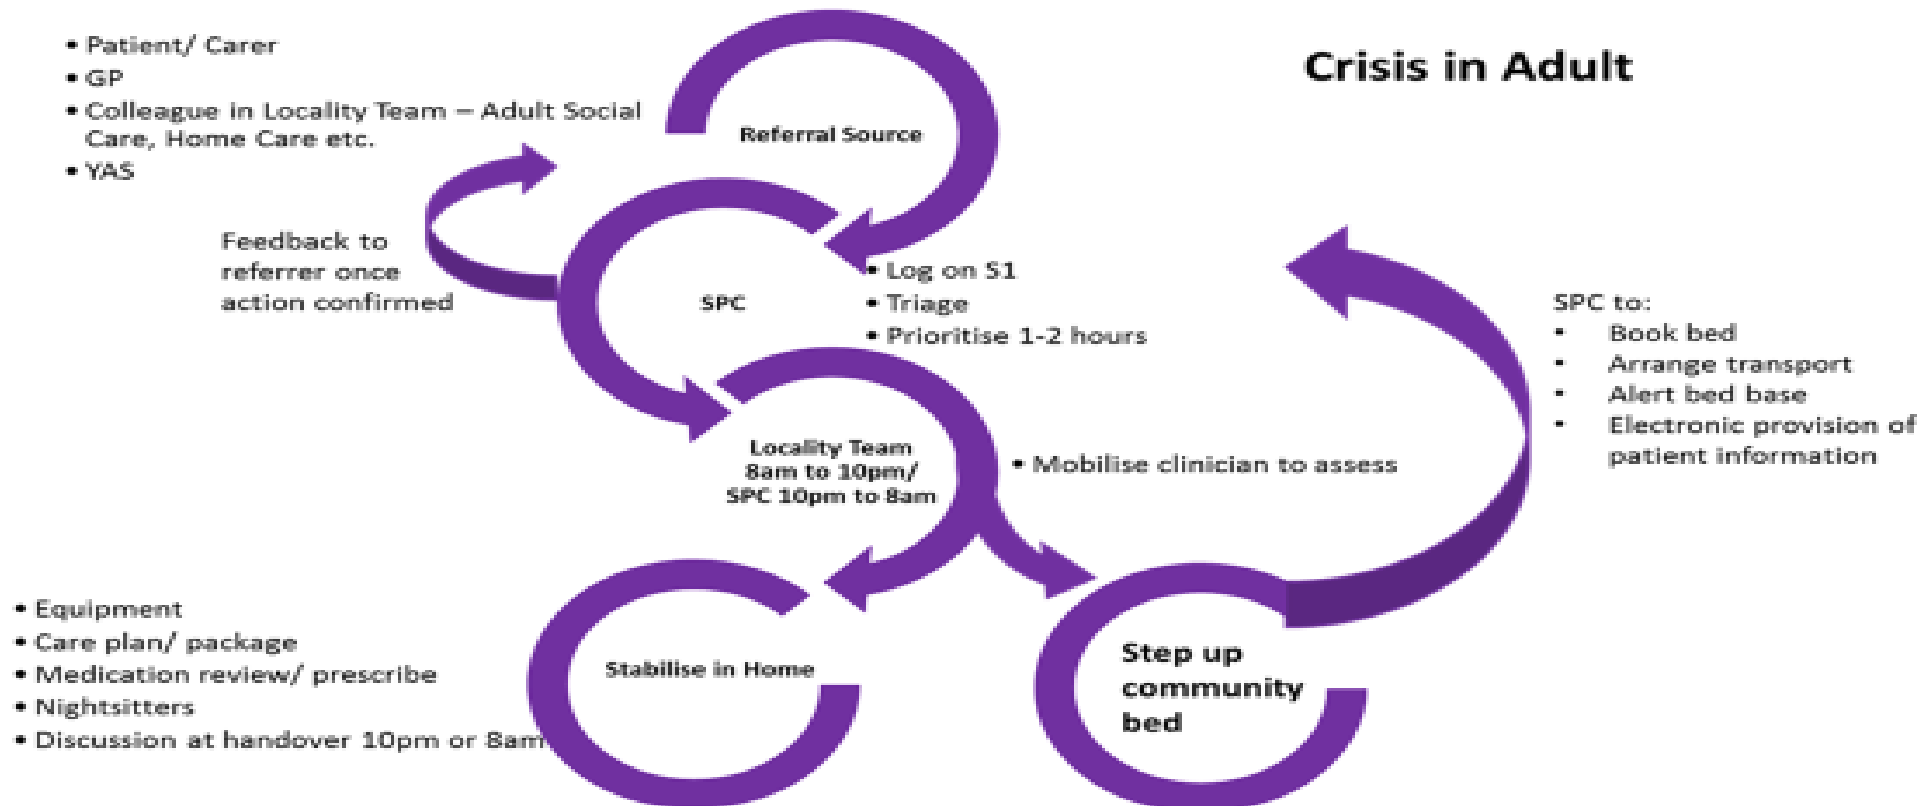
Urgent response within 2 hours for early intervention to manage a crisis or exacerbation

Holistic assessment and intervention aiming to see, treat and complete care in a single attendance

Improve self care, avoid exacerbation and maximise prevention

Risk management approach to complex needs

Keeping people at Home



Locala NHS

Transformation and development plans

Unplanned activity and rapid response

Development of “Hubs” with primary care – IV therapy, wound care…..

Princess Royal Development
